**A BRIEF REPORT ON GARLIC PRODUCTION IN THE COUNTRY**

The major garlic producing states are Madhya Pradesh, Gujarat and Uttar Pradesh. The crop condition of garlic at present is very good and the present climatic conditions are very much favourable for bulb development in the field. As per the NHRDF's estimates, the area and production of garlic are expected to be the same as of the last year.

The harvesting of garlic has been started in M.P. and in other states; it is expected to be started from March, 2016 onwards.

This year, the garlic storage is expected to be more than the last year in the country.
